

IMAGE TECH

Transforming Workspaces

Who We Are

**Imagetech is a leading provider of
office furniture and acoustic solutions**

A trusted partner to the world's leading Workplaces for high-quality ergonomic solutions that promote productivity, health, and comfort. We specialize in providing a wide range of products, including monitor arms, height adjustable tables, and ergonomic chairs, designed to enhance the functionality and efficiency of modern offices.

Vision

Our vision at Imagetech is to be the global leader in office furniture design and manufacturing. We aspire to set new standards for workplace ergonomics, aesthetics, and sustainability. By continuously pushing the boundaries of creativity and technology, we envision a future where every workspace we touch becomes a hub of innovation and efficiency. We strive to inspire organizations to redefine their workspaces and foster a culture of excellence, one well-designed office at a time.

Mission

At Imagetech, our mission is to transform workspaces into inspiring environments that enhance productivity and well-being. We are committed to providing innovative, high-quality office furniture solutions that not only meet the functional needs of our customers but also reflect their unique style and values. Through sustainable practices and exceptional customer service, we aim to create lasting partnerships and contribute to the success of businesses worldwide.

Environment, Health & Safety

Imagetech places a paramount emphasis on acknowledging and actively addressing the growing importance of sustainability and environmental protection with the following:

- **Responsible Material Sourcing:** We diligently select suppliers who share our values and commitment to sustainability. This ensures that the raw materials used in our products meet the highest environmental standards and contribute to responsible resource management.
- **Efficient Production Processes:** Within our manufacturing facilities, we implement streamlined and efficient production methods. These processes are designed not only to maintain the highest quality of our products but also to minimise waste generation at every step.
- **Eco-Friendly Practices:** Throughout our operations, we prioritise eco-friendly practices that reduce our environmental footprint. This includes using energy-efficient equipment and technologies and exploring innovative ways to limit our impact on the environment.
- **Waste Reduction:** We are proactive in reducing waste by reusing and recycling materials whenever possible. Our commitment extends to disposing of waste responsibly to prevent harm to the environment.
- **Compliance and Accountability:** We are fully committed to meeting and exceeding all statutory, legal, legislative, environmental, and governmental requirements. Our aim is to operate within strict compliance standards and foster a culture of accountability across our organization.

TRIMONT

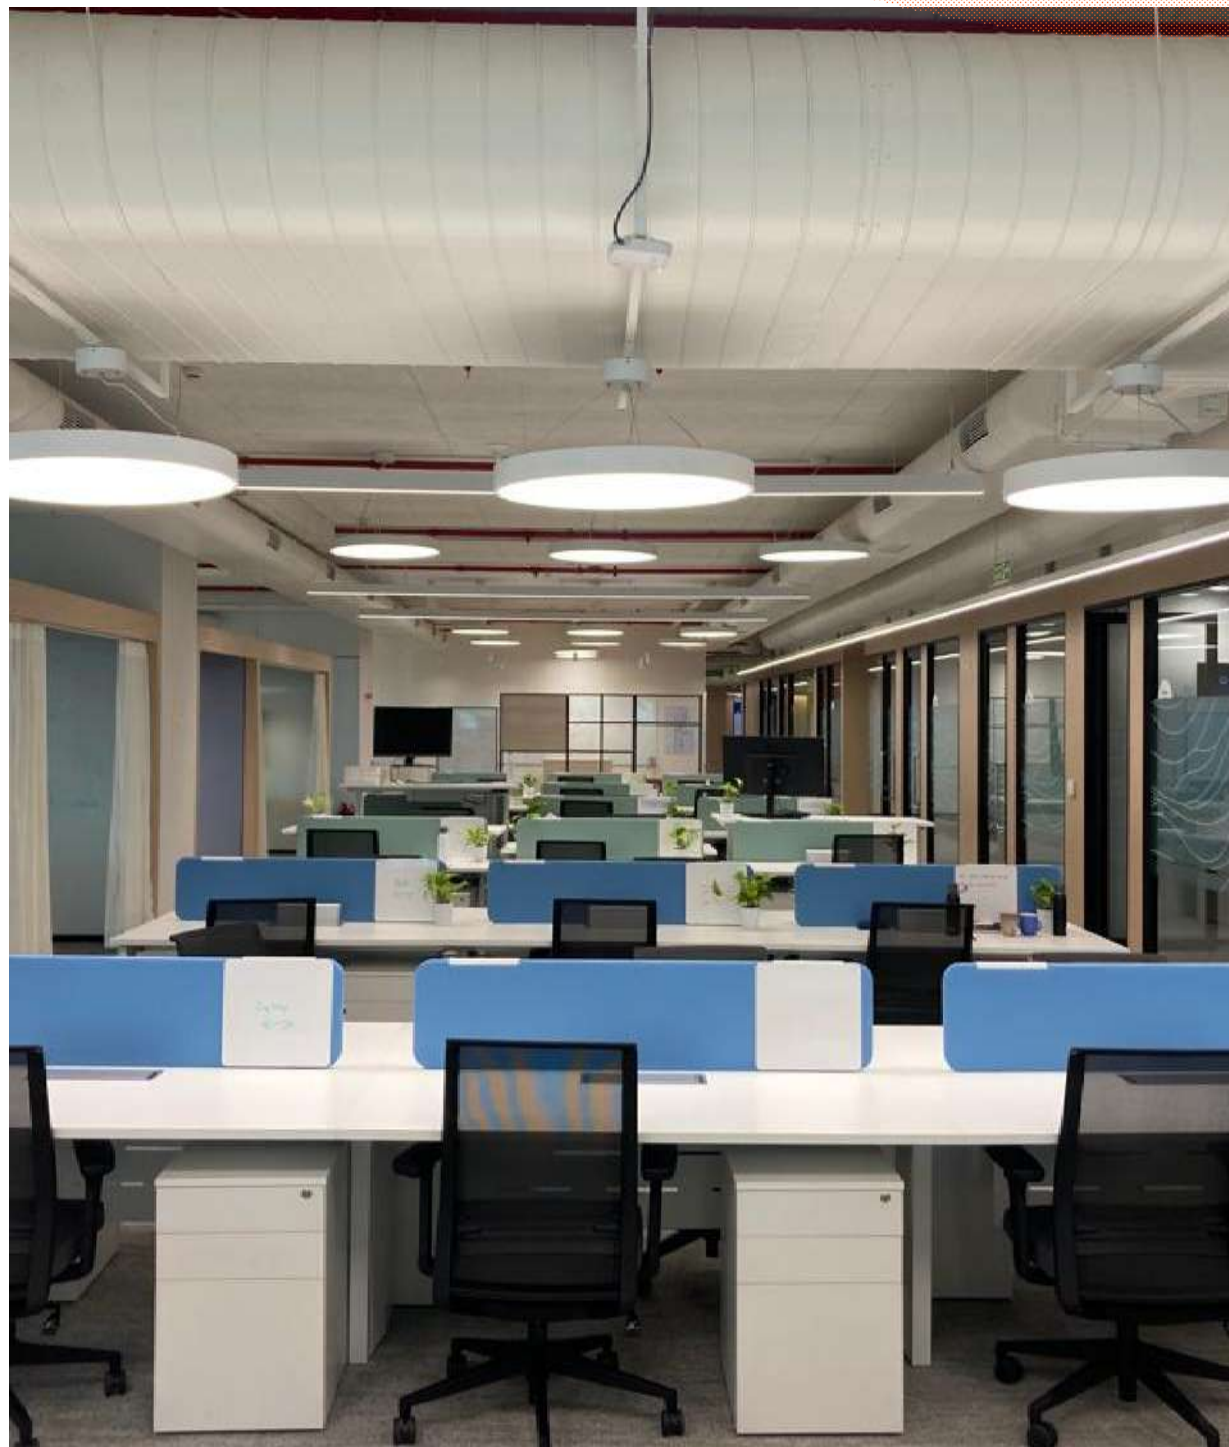

As part of Trimont's initiative to enhance workplace ergonomics and employee productivity, we successfully supplied and installed HAT workstations along with fully adjustable monitor arms at their Bangalore and Hyderabad offices. These ergonomic setups were selected to support a flexible, health-conscious work environment, catering to both seated and standing work preferences.

United Nations

IN2 HAT and Flex Monitor Arms to United Nation Bangkok, enhancing their workspace with an open-plan desking system and ergonomic monitor arms. Elevate your office environment with our innovative solutions, promoting both functionality and comfort for a productive work experience at UN Bangkok .

FI Money Bangalore with our In2 Desking Workstations and Curva Chairs, combining modern design and ergonomic comfort. The sleek workstations foster collaboration, while the contemporary chairs ensure a productive and comfortable work environment.

Hindustan Unilever Limited

Delighted to outfit Hindustan Unilever with our innovative Social Swing from Bejot Poland, fostering a dynamic and collaborative workspace. The Social Swing creates an informal meeting place that stimulates creativity at the same time transferring the atmosphere of the park to the office. This is the place where the most inspiring and surprising ideas can arise in an atmosphere of free discussion.

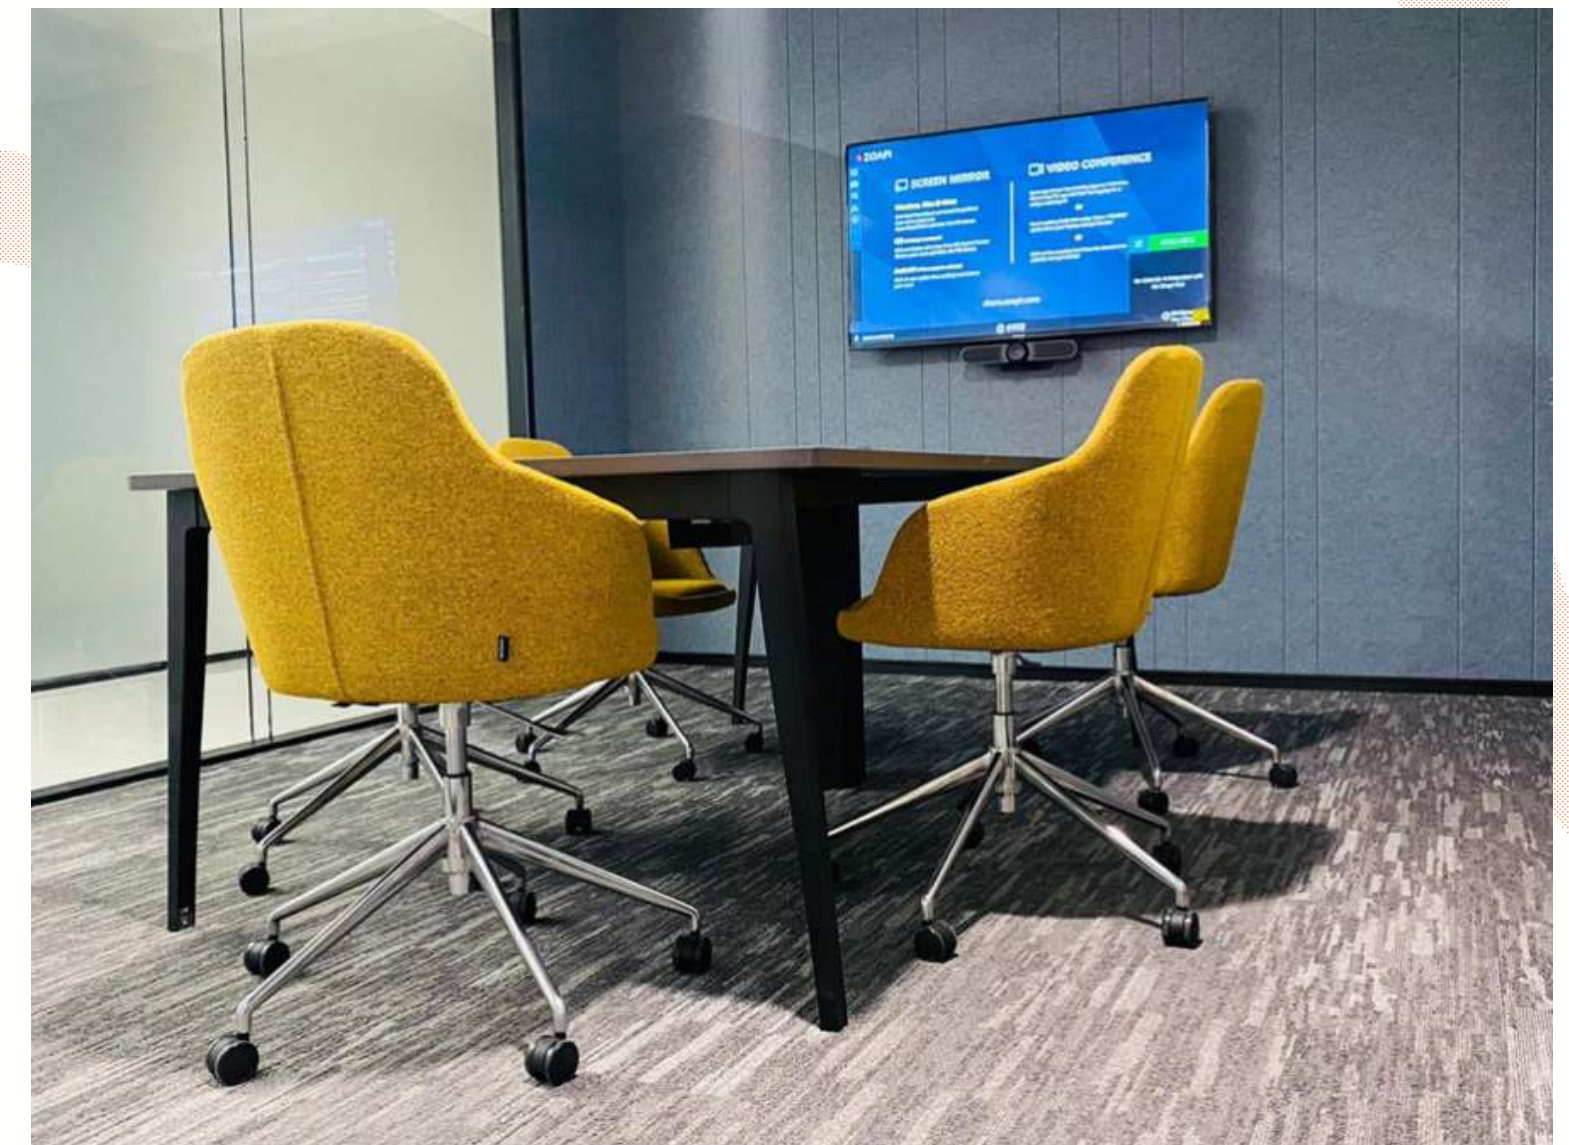

Google with our I-Move -versatile Movable Writing Board, offering dual functionality. One side serves as a pin-up for space division, ensuring privacy, while the other encourages collaborative brainstorming. Elevate your workspace with this innovative solution, striking the perfect balance between division and collaboration for a dynamic and productive environment.

Location -Bangalore | Hyderabad, Year :2023 | 2024

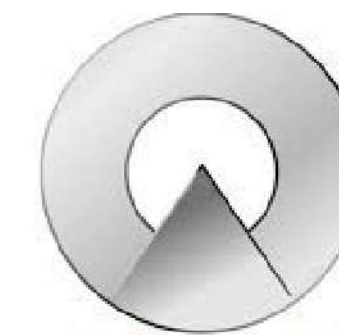

Prosus has embraced our IN2 Desking, PI Chairs, and loose furniture to craft a boutique office in Bangalore. Our stylish and ergonomic solutions contribute to a dynamic and comfortable workspace, reflecting the innovative spirit of Prosus. Elevate your office with our premium furniture for a distinctive and inspiring environment.

Novo Nordisk with Feltech's AcouPanel, an acoustic solution featuring printed drawings inspired by planet images. Our customizable designs, directly printed onto AcouPanels, create a unique and impactful statement without compromising the noise reduction values. Elevate your workspace with our innovative and personalized acoustic solutions

Schindler

Workspace project for Jardine Schindler in Bangkok. Our team has meticulously executed the supply and installation of IN2 Desking, complemented by the addition of Ergonomics Curva Chairs, to create an innovative and conducive environment for open collaboration.

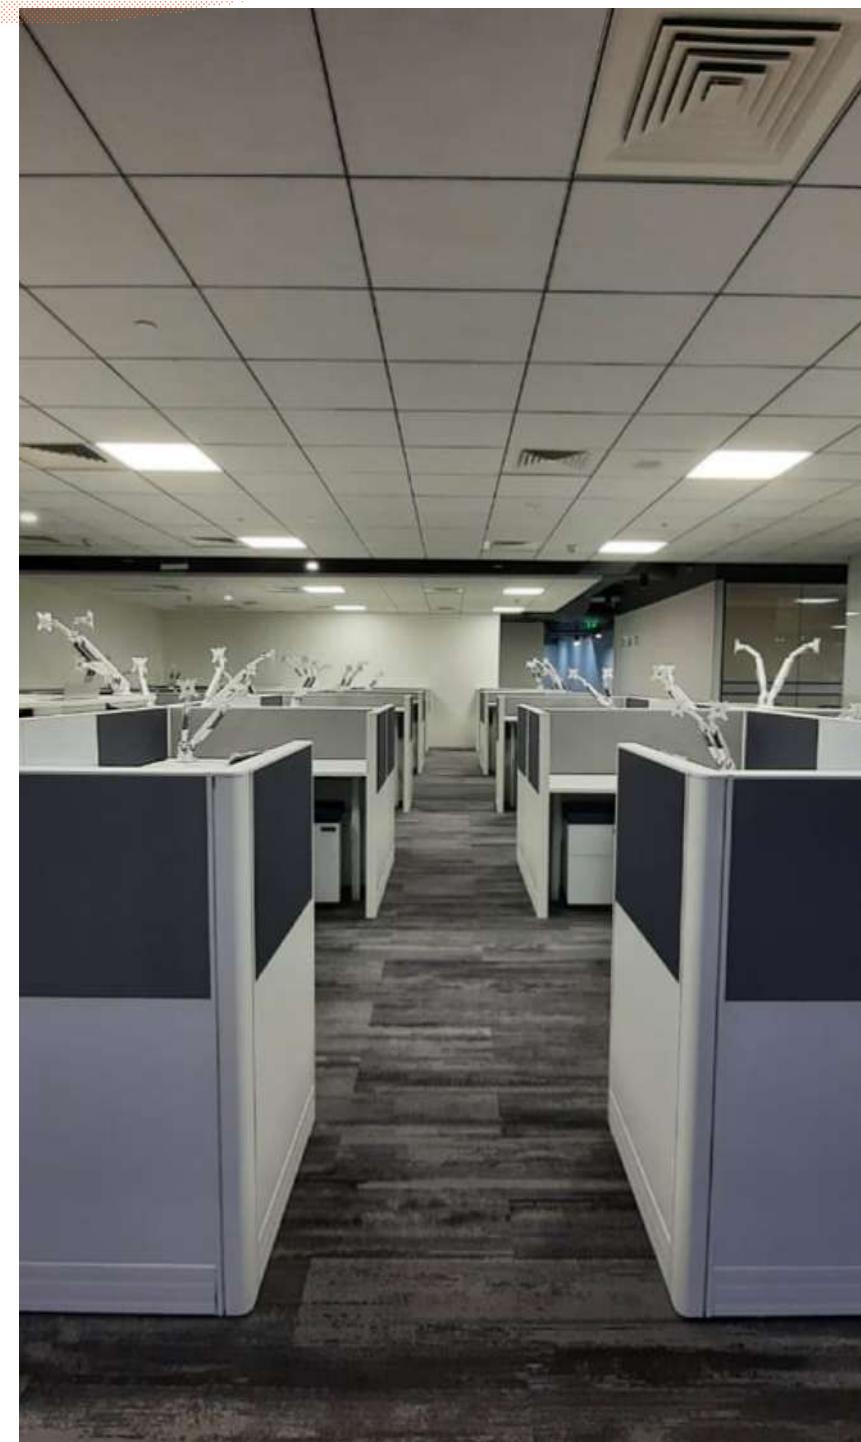

The project encompassed the provision of the versatile IN2 Desking System, complemented by SLB Monitor Arms for ergonomic workstations, and the inclusion of lounge furniture to enhance collaborative spaces within Athena Health's Chennai office.

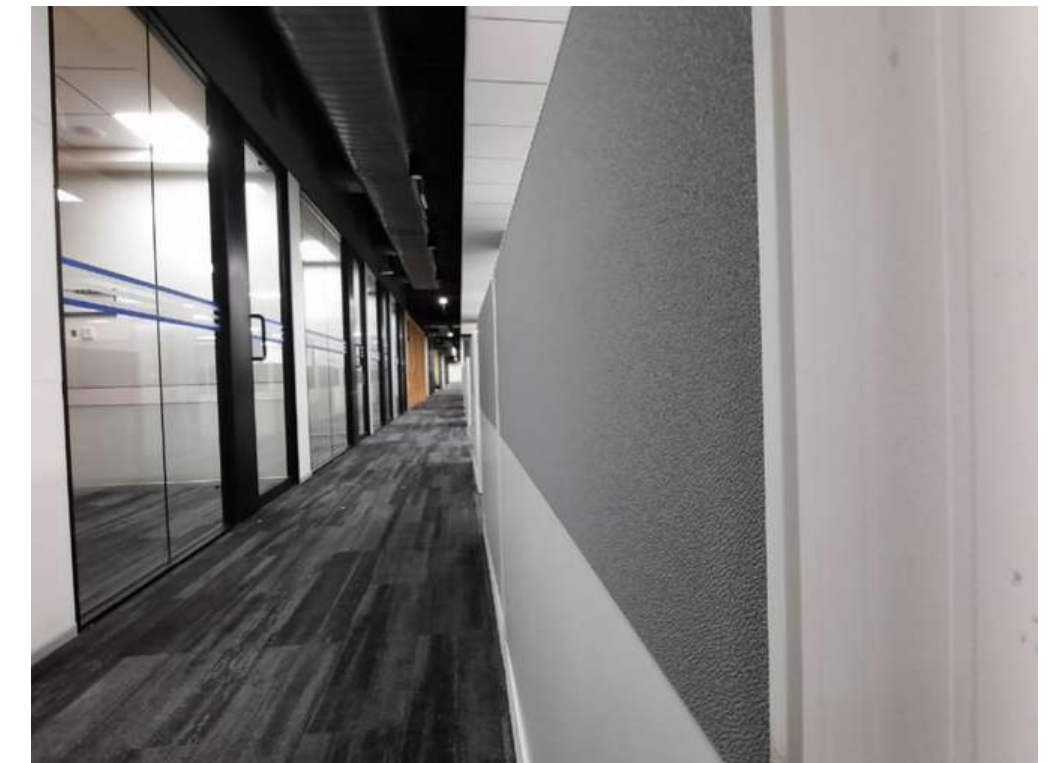

Our team worked closely with Athena Health to ensure that the chosen furniture solutions seamlessly integrated into the workspace design. The IN2 Desking System offers flexibility and adaptability, fostering a dynamic work environment. The addition of SLB Monitor Arms contributes to ergonomic workstations, promoting employee well-being and productivity.

The project involved the supply and installation of the IN2 Partition System, complemented by Vertex Monitor Arms, creating cubicle-type workstations at Micron Technology's premises.

Our collaboration with Micron Technology was centered around designing workspaces that prioritize focus, privacy, and efficiency. The IN2 Partition System, with its modular and customizable design, perfectly aligns with these objectives. The cubicle-type workstations offer enhanced privacy, allowing employees to concentrate on their tasks without external distractions.

Delivered superior sound absorption (NRC 0.45) with AcouPanel® to Zebra Technology in Bangalore. Our innovative solutions include Baffle Ceilings and CNC-cut panels affixed to printed walls, providing effective noise reduction. Elevate your space with our acoustic solutions for enhanced comfort and a noise-free environment

PREQIN

IN2 Desking and Flex Monitor Arms to Preqin Bangalore, enhancing their workspace with an open-plan desking system and ergonomic monitor arms. Elevate your office environment with our innovative solutions, promoting both functionality and comfort for a productive work experience at Preqin.

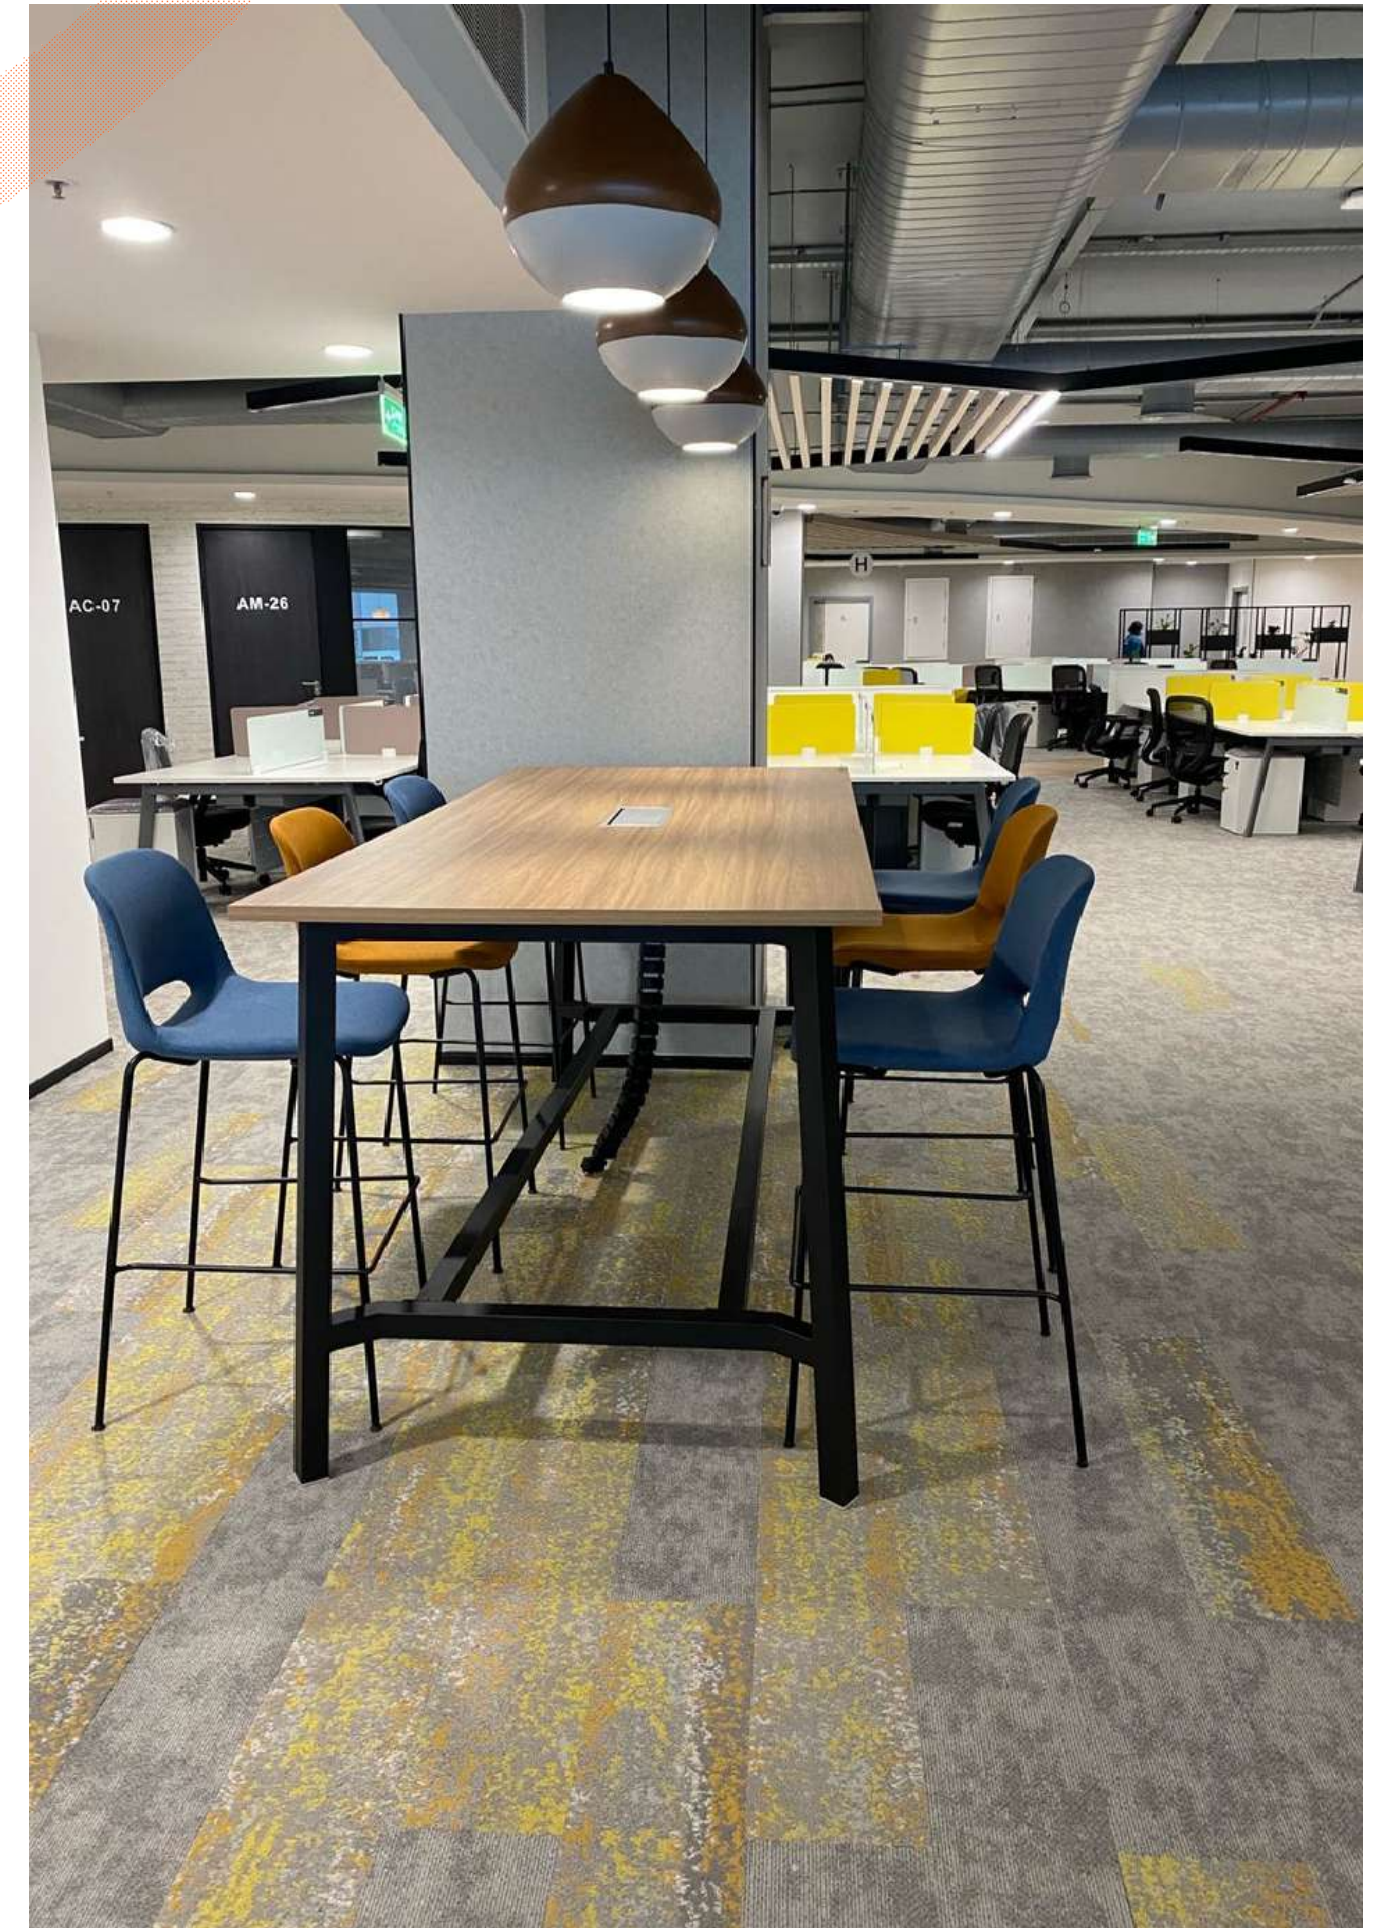

Baxter

Baxter has chosen our lounge chairs for a welcoming reception ambiance, while bar chairs and cafe chairs enhance the dynamic atmosphere in their office. Elevate your workspace with our stylish and versatile seating solutions, creating a comfortable and sophisticated environment for both professional and relaxed settings at Baxter's office

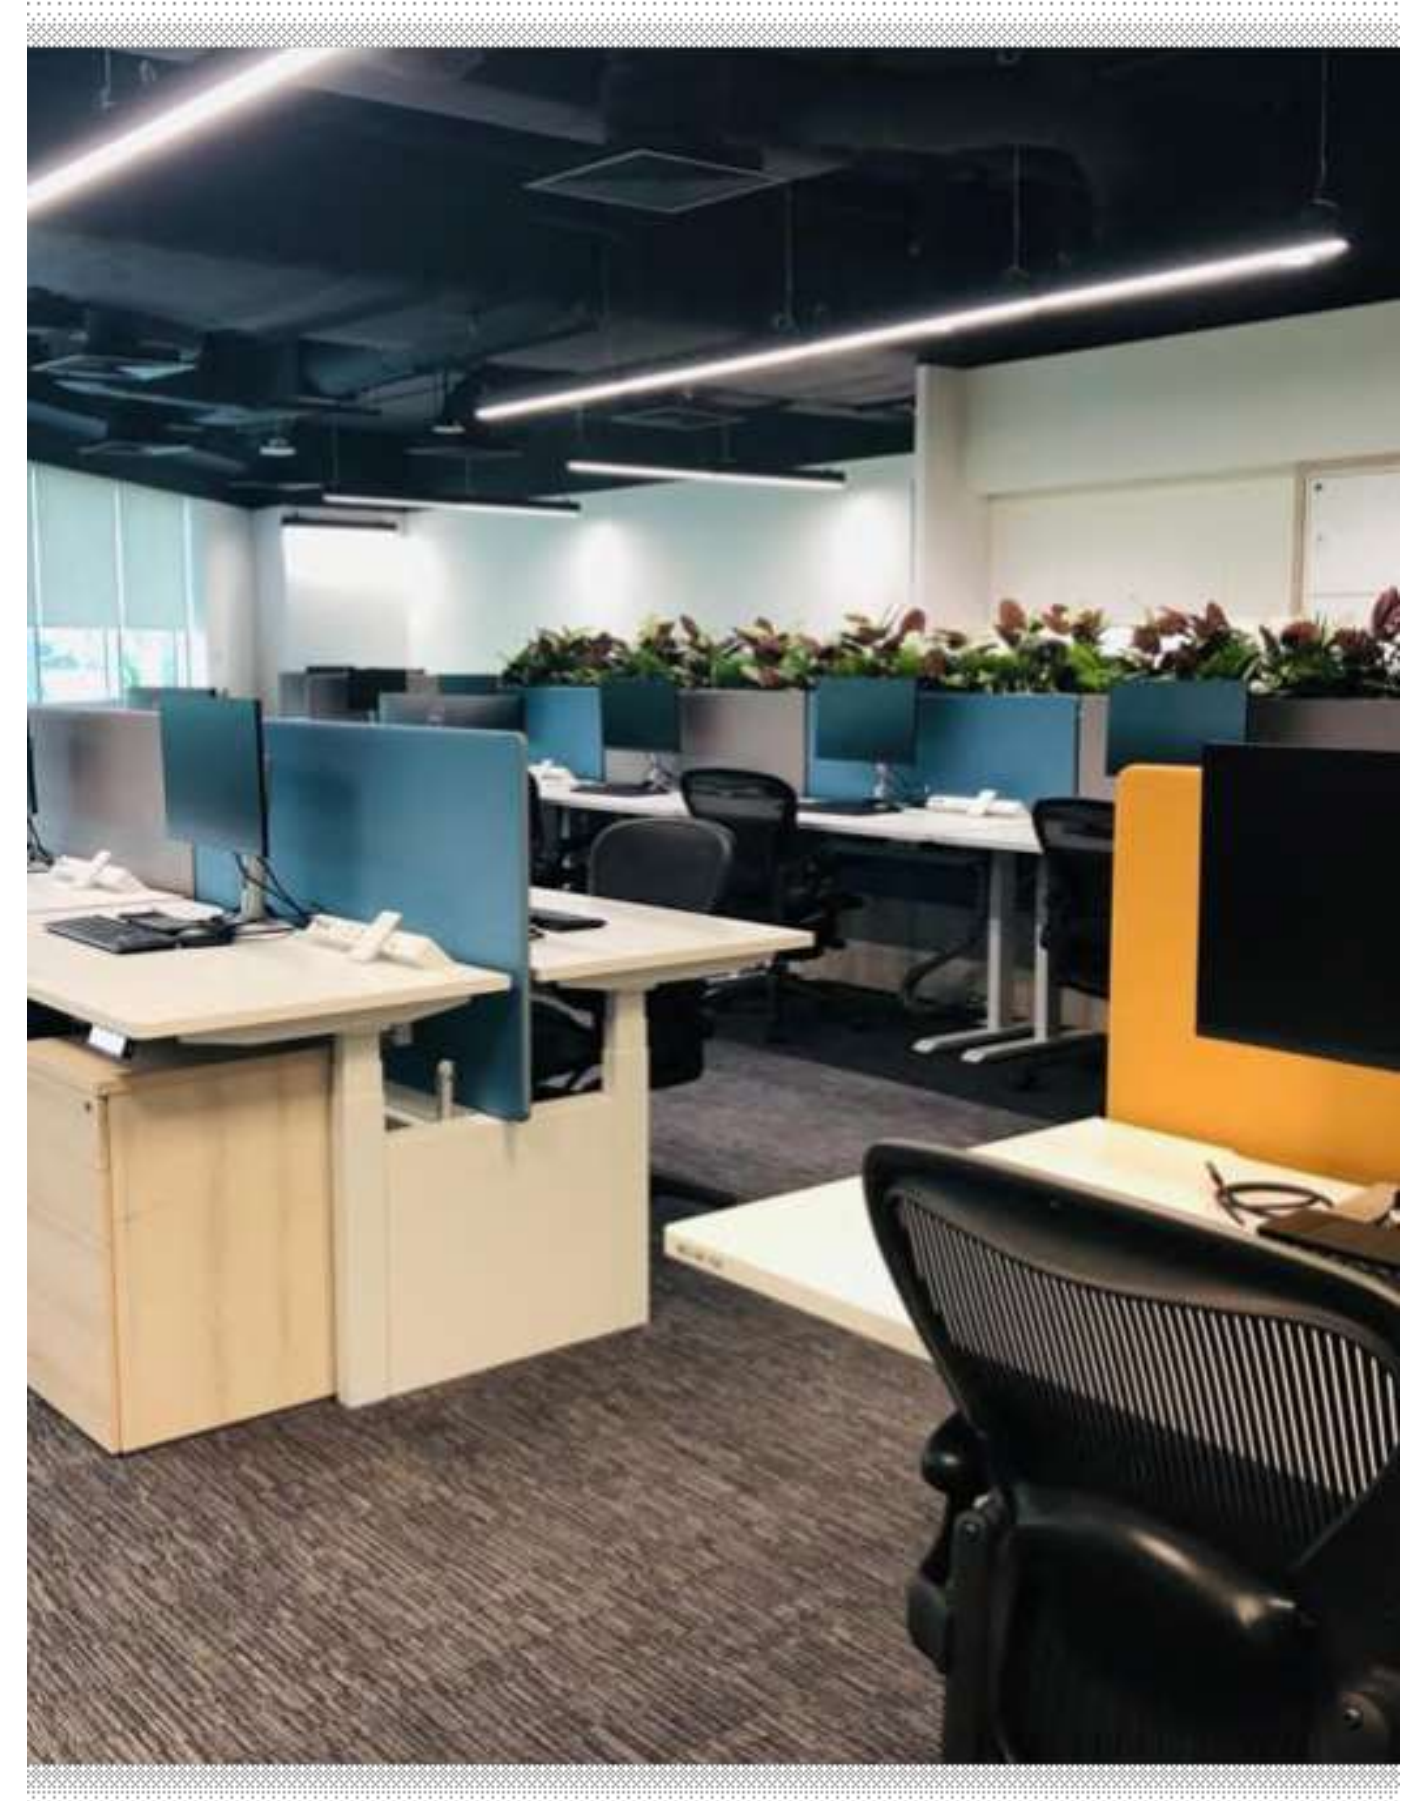

The project encompassed the design, manufacturing, and installation of collaborative furniture, specifically lounge chairs and cafeteria furnishings, tailored to meet Titan Software's unique requirements. Design Concept: Our team worked closely with Titan Software to develop a design concept that harmoniously integrates functionality, comfort, and aesthetics. The collaborative furniture selected is not only visually appealing but also aligns seamlessly with the company's corporate culture and workspace ethos.

INSIST HAT Workstation to Dell offices in Singapore and Thailand. This deployment supports Dell's ongoing engineering and development activities by providing high-performance, reliable computing solutions tailored to their technical requirements. The project reflects our capability to deliver advanced workstation systems across multiple regions in Southeast Asia.

RMZ Builder's corporate facility in Hyderabad India, we delivered a complete furniture solution for their cafeteria and breakout zones, focusing on both aesthetics and functionality. The scope included supplying modern, high-durability furniture designed to foster relaxation, informal collaboration, and employee well-being.

Our collaboration with Thermo Fisher focused on infusing innovative design concepts into the office space. The lounge furniture was carefully selected to offer comfort and style, creating inviting areas for relaxation and informal meetings. The desking system was designed to optimize functionality and adaptability, promoting seamless collaboration and interaction among team members.
